

Single Multi-block hanger two layer, with hot dip galvanized angle member adapter

Single Multi block hanger support systems are designed for organizing bundled runs of coax cable. Each space-saving block securely holds one run of coax, allowing a compact bundle of up to 3x runs to be supported by stacking three blocks.

FEATURES / BENEFITS

- Single Multi Blocks are manufactured of polypropylene -> thus providing thermal, chemical and UV resistance in all environments.
- They come complete with angle member adapter and all necessary hardware -> no additional parts required
- The angle member adapter fastens the clamp to the tower without drilling -> improving speed and avoiding issues with tower static and corrosion.
- The hanger mounting rod may be located in either of two mounting holes, depending on orientation of the fixing member -> will fit any installation scenario.
- Compliant to RoHS (EU 2002/95/EC) and CRoHS (China SJ/T11363-2006) i.e. usable on a global basis.

Notes

For applications with extreme focus on long term esthetical appearance or under adverse environmental conditions the use of all stainless steel versions should be considered
